EXPERIENCE

Sainsburys Online Assistant

**Crayford, UK
November 2018 - August 2021**

- Handled customer service to a high standard on a daily basis
- Trained new colleagues to company's standards on multiple occasions
- Extremely reliable and flexible, I worked both dayshift and night shift
- Took responsibility and rotated through multiple job roles, including Online Assistant, Sales Assistant and General Assistant
- Familiar with the computer systems and software used at this establishment

SKILLS & INTERESTS

Java, Python, Github, Linux, Networking Fundamentals, Computer Hardware Repairs, Understands Portuguese

Interests: Outside of technology and software, finance and investing greatly interests me. I write a blog in which I go over my finances and my future financial goals and how I plan to achieve these.

PROJECTS

Personal Finance Tracker (Under Development)

- Users are able to track their networth by adding different bank/investment accounts.
- Graph element displays user's current net worth, able to project future net worth.
- Linked to a database that will securely store user's accounts and figures.
- I plan on adding APIs to make the user's experience more automatic.

Bitcoin Price Bot (<https://github.com/Eric-Nobrega/btcPriceBot>)

- Created a bot that retrieves the current price of Bitcoin and will display it within a GUI interface.
- Able to text the user the price of Bitcoin through the use of Telegram.

Automated Interactive Clock

(<https://github.com/Eric-Nobrega/Bootcamp-Project-Interactive-Clock>)

- City, University Of London Bootcamp Project

- An interactive GUI clock in which the user can select a city to display the time, effects will be displayed depending on time
